■ **Niagara Store Fixtures Inc. takes great pride** in all aspects of its work and the quality of the fixtures produced speaks for itself. With over 30 years of experience manufacturing store fixtures and millwork throughout North America, our staff is experienced in a vast variety of projects and materials. Our field of expertise ranges from projects in the jewellery showcase, retail store, financial institution and salon industries.

Utilizing technology and skilled craftspeople we are able to produce the most intricate and demanding designs. Having vast experience working with architectural materials such as wood, laminates, metal, plastic, solid surface, lighting, marble and stone, we are able to produce a wide spectrum of quality and unique pieces.

At Niagara Store Fixtures Inc. we are able to work from supplied drawings or design our own projects utilizing computer aided design. Working from a simple sketch or architectural drawings, we are able to turn the design into reality.

For each project small or large our engineering team will begin to turn your project into reality by providing detailed shop drawings. These detailed shop drawings provide clear and concise details for manufacturing and installation as well as provide co-ordination for everyone involved in the project from architect or designer to the site supervisor.

An experienced project manager will be your contact throughout the entire project. Co-ordinating with the plant floor and on-site supervisor, your project manager will ensure your project will be delivered on time.

Providing the same passion and attention to detail Niagara Store Fixtures Inc. also provides installation services for all projects to ensure your project will be just as beautiful as you imagined it to be.

jewellery showcases

Jewellery display cases demand a rich, quality appearance that can only be achieved by precise and skilled fabrication. Whether your location is a nationwide franchise or a single customized location, having the ability to produce many styles of showcases including working with bent glass and having in-house electrical knowledge ensures you we have the capabilities to work with you, no matter what your needs may be.

retail stores

Working with diverse materials enables us to create custom store fixtures unique to each retailer. Using only the highest grade materials, beautifully matched veneers, and hand applied stains & lacquers our store fixtures are made to last. Some locations we have been involved with are over 15 years old and still look as beautiful as they did the day they were built.
